The website uses first and third-party cookies to analyze traffic, to personalize content and provide target ads. Click "Show details" for selecting which types of cookies you'll allow. Please read more at our [cookie policy](#) and [privacy policy](#) pages.

ACCEPT COOKIES SHOW DETAILS

GDPR and ePrivacy – Collection of Website Visitors' Consent

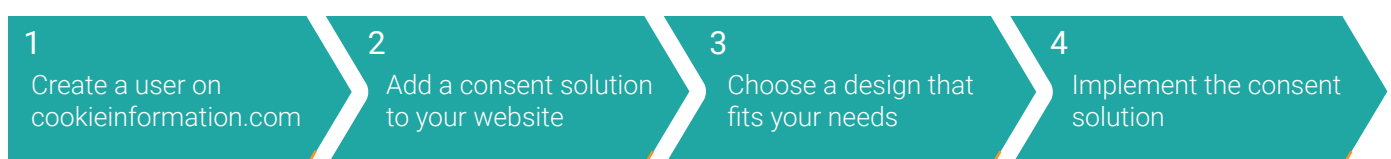

If your website uses technologies such as plugins, pixels or widgets that set cookies, your website must comply with the Cookie/ePrivacy directive. You must inform website visitors and get their consent before using cookies.

More than 95% of all websites use cookies or process personal data about visitors, such as user-ID, IP address or geolocation. If your website uses cookies that transfer personal data to a third-party or to yourself, you must adhere to the GDPR. To be compliant, you are required to provide documentation for each visitor's consent to the processing of their personal data and proof that your website respects cookie opt-outs.

The Cookie Solution Contains:

- ✔ Consent pop-up
- ✔ Privacy controls for opt-in and opt-out of cookie consent
- ✔ Design customization features
- ✔ Documentation for each visitor's consent in case of inspection from the Data Protection Agency.

Easy and swift access:

The Consent Solution contains:

Consent Pop-up

The consent pop-up informs the website visitor about cookies and asks for consent. Our solution creates a legal log for each visitor's consent.

Scanning

Cookie Information regularly scans your websites and thoroughly examines which cookies are being used. You can fully customize how many pages are scanned and how frequently.

Opt-in or opt-out option

Intuitive buttons make it easy for the visitor to navigate to which purposes they are giving consent. The visitors are always able to view or change their consent.

Cookie policy

Our cookie policy contains detailed information about the cookies set by scripts and pixels embedded on your website. You get information about which cookies are used, which companies receive data, how the data is used and how long the cookies remain active.

The Cookie Knowledge Database

The Cookie Knowledge Database is used to update your website's cookie policy. The Knowledge Database contains expert knowledge regarding first- and third-party cookies.

Blocking cookies

Cookie Information's Software Development Kit (SDK) controls the execution of scripts using cookies and ensures that tracking via cookies does not initiate before the website visitors' consent have been collected. You are able to implement your code directly to the SDK or using the tag manager.

Reporting basic solution

- Basic cookie insight
- New and deleted cookies
- Number of website visitors who opted-in
- Review report (when needed)

Try the Compliance Dashboard if you want deeper insight, and/or have multiple websites, and want to monitor cookie privacy risks.

IAB and FDIH

Cookie Information is officially approved by IAB and FDIH as a CMP Partner (Consent Management Platform) and offers integration of IAB and FDIH's consent solutions in our cookie pop-ups.
